Professional Summary

UI/UX Designer & Design Engineer with 2+ years shipping 30+ live products across fintech, retail, and SaaS. Creator of SDS Motion Forge, a live CSS animation system with 1,850+ npm downloads, and FrameStack PDF, a live Figma plugin. Currently building UNBOND (closed testing) and UXORA (in development). Skilled in Figma, Flutter, Angular, and GSAP — from wireframe to shipped code.

Technical Skills

Product & UX

UX Research, User Flows, Wireframing, Prototyping, Usability Testing, Design Systems, Interaction Design, Responsive Design, Accessibility (WCAG), Design Tokens, A/B Testing, Stakeholder Management

UI & Visual Design

Mobile & Web Design, Visual Design, Typography, Component Systems, Motion Design, Microinteractions, Branding

Frontend & Engineering

HTML, CSS, JavaScript, TypeScript, Angular, Flutter, Bootstrap, GSAP, CSS Animations, npm Package Development, Git, GitHub

Design Tools:

Figma, Photoshop, Illustrator, Adobe XD

Analytics & Optimization

Google Analytics, Hotjar, User Behavior Analysis, Conversion-Focused Design

Professional Experience

UI/UX Designer

JRK Consulting Services, Chennai | Mar 2024 – Present

- Designed UI/UX and frontend for DigiGold, a live fintech savings app used for daily transactions
- Shipped 30+ live products for Pothys, GRT Jewellers, Lalitha Jewellery, Mangal & Mangal
- Built responsive, high-performance interfaces using Flutter, Angular, Bootstrap, and GSAP, contributing to a 15% increase in user engagement across key client projects
- Built pixel-perfect design systems and motion interaction standards, reducing design-to-development handoff time by 25% and improving implementation accuracy across teams
- Ran usability testing and stakeholder reviews across every product cycle
- Every product built under Salkom is live, shipped, and used by real users.

UI/UX Designer & Founder

Salkom Design Studio, Puducherry | Jul 2025 – Present

- Founded independent studio delivering UI/UX, branding, and frontend for 3+ clients
- Led brand identity, UI, and end-to-end digital ownership for Aura Elite Events — managed a 3+ person team across video, marketing, and design
- Drove full digital marketing campaign and poster/video creative — sold-out event, 1,200+ tickets sold
- Designed UX for VertexEleven Gamehub, a fantasy gaming app, from 0→1
- Led UX research, wireframes, and UI systems across all studio products

Key Projects

UNBOND — Employment Bond Tracker App | *Closed Testing, Play Store*

- Built the full frontend in Flutter for an app solving a problem no one else has shipped for — tracking bond terms, exit dates, and penalties in real time
- Directed AI-assisted backend development (Claude Code) for Firebase Auth, Supabase, and secure session handling, based on architecture I designed
- Owned the complete product build — UX, UI, frontend, and system design — structured with Riverpod and GoRouter ahead of public launch

SDS Motion Forge — CSS Animation System | *Live on npm*

[View Live ↗](#)

- Built a production-grade CSS animation system with 600+ animations, now running in 4 live client applications in production
- Grew to 1,850+ organic npm downloads with zero paid marketing — driven entirely by developer-first documentation and open-source adoption
- Architected a modular, framework-agnostic system across React, Angular, Tailwind, and Web Components, backed by CI/CD and zero-breaking-change releases

FrameStack PDF — Figma Plugin | *Live on Figma Community*

[View Live ↗](#)

- Developed a Figma plugin that exports multi-frame designs into a single PDF, now used by designers worldwide on Figma Community
- Built the export UX and frontend logic using the Figma Plugin API and jsPDF, optimized for large, complex file exports
- Owned product strategy end-to-end — introduced outcome-based presets that lifted feature discovery by 34%, shipped 4 releases in 28 days with zero regressions

UXORA — AI-Powered UX Learning Platform | *In Development*

- Designing and building an AI-powered UX learning platform with 8,000+ pre-generated scenarios and 2,000+ challenges — focused on real-world product decision-making, not multiple-choice quizzes.
- Architecting core product experiences in Figma and Flutter — covering onboarding, scenario engine, challenge flows, and adaptive learning paths with a focus on engagement, usability, and scalability.
- Engineering AI-driven learning systems, XP-based gamification, global leaderboards, 28-day subscription billing, AI-powered challenge reviews, and certification workflows to drive retention and long-term growth.

Achievements & Highlights

- Solo-built and shipped 2 live production tools — SDS Motion Forge and FrameStack PDF — with zero paid marketing spend
- Crossed 1,850+ organic npm downloads on a self-published open-source animation system
- Delivered 30+ live products across fintech, retail, and jewellery e-commerce for brands including Pothys, GRT Jewellers, and Lalitha Jewellery
- Promoted from Trainee to Junior UI/UX Designer within 2 years at JRK Consulting Services

Education

Bachelor's Degree, Computer Science | 2018 – 2021

Rajiv Gandhi Arts & Science College, Pondicherry

Certifications

C-Tech (GWDC)

Meta — Principles of UX/UI Design

Google — Foundations of User Experience (UX)
