Professional Summary

Product Designer & Design Engineer with 2+ years shipping 30+ products across fintech, retail, and SaaS. Founder of Salkom Design Studio and solo creator of SDS Motion Forge — a CSS animation platform with 600+ animations, 1,800+ weekly npm downloads, and framework integrations for React, Angular, Tailwind, and Web Components, scaled to v5 with zero paid marketing. Published FrameStack PDF on the Figma Community. Currently building UXORA, an AI-powered UX learning SaaS. I work at the intersection of design systems, frontend engineering, and product thinking — closing the gap between what is designed and what ships. I design the system, write the code, and ship the product.

Professional Experience

Founder & Product Designer

Salkom Design Studio, Pondicherry (Jul 2025 – Present)

- Founded a multidisciplinary design and product studio delivering UI/UX, branding, frontend engineering, and digital marketing — serving 3+ active clients across events, gaming, and SaaS.
- Published SDS Motion Forge on npm — 600+ animations, 1,800+ weekly downloads, React, Angular, Tailwind, and Web Components integrations, scaled to v5 with zero marketing.
- Published FrameStack PDF on Figma Community — approved by Figma’s team, enabling direct multi-frame PDF export with active users globally.
- Aura Elite Events: Led brand identity, campaign strategy, and creative execution — sold-out event (1,200 tickets), 200+ additional sales in the final week.
- VertexEleven Gamehub: Designed a fantasy gaming app from 0→1 — UX research, wireframes, UI systems, and prototypes, collaborating directly with the founder on core product decisions.
- Uxora (In Progress): Building an AI-powered UX learning platform with 8,000+ scenarios, XP systems, and subscription monetization — powered by Claude AI, launching 2026.
- Every product built under Salkom is live, shipped, and used by real users — not side projects, not prototypes.

UI/UX Designer

JRK Consulting Services, Chennai (March 2024 – Present)

- Led end-to-end UI/UX design and frontend development for DigiGold — a high-scale gold savings fintech platform handling daily financial transactions in production, enabling users to enroll, pay, and track schemes seamlessly.
- Designed and shipped 30+ web and mobile products for India's leading jewellery brands including Pothys, GRT Jewellers, Lalitha Jewellery, and Mangal & Mangal — delivering consistent, conversion-focused user experiences across platforms.
- Built responsive, high-performance interfaces using Flutter (UI), Angular, Bootstrap, and GSAP — directly contributing to a 15% increase in user engagement across key projects.
- Established pixel-perfect UI systems and motion interaction standards, reducing design-to-development handoff time by 25% and improving implementation accuracy across teams.
- Acted as the bridge between design and engineering — collaborating with developers, managers, and stakeholders to translate business requirements into scalable product experiences.
- Worked closely with client-side stakeholders and retail decision-makers to ensure brand consistency, usability, and business alignment across every digital touchpoint.
- Promoted from Trainee to Junior to UI/UX Designer within 2 years — consistently delivering production-ready work across every level.
