Professional Summary

Product Designer & Frontend Developer with 2+ years of experience designing and shipping 30+ web and mobile products across fintech, retail, SaaS, and consumer platforms. Progressed from Trainee UI/UX Designer to UI/UX Designer at JRK Consulting Services, contributing to scalable product experiences for leading brands. Founder of Salkom Design Studio, currently building UXORA — an AI-powered UX learning SaaS focused on real-world product thinking and scenario-based learning.

Professional Experience

Founder & Product Designer

Salkom Design Studio, Pondicherry (Jul 2025 – Present)

- Founded and scaled a multidisciplinary design studio delivering UI/UX, branding, digital marketing, and product development — currently serving 3+ active clients.
- **Aura Elite Events (Pondicherry):** Led end-to-end creative and marketing execution for a New Year event, covering brand identity, promotional assets, and campaign strategy. Built and managed a 3-member team (video editor, marketer, designer).
Achieved a **fully sold-out event (1,200 tickets)** and drove **200+ additional ticket sales** in the final week through extended campaign execution.
- **VertexEleven Gamehub:** Designed a fantasy gaming mobile app from 0→1 — UX research, wireframes, UI systems, and interactive prototypes. Collaborated directly with the founder on **core product decisions, user flows, and gameplay mechanics**.
- **Raaj Computer Peripherals & Real Estate Client:** Managed end-to-end delivery of video content projects by coordinating external editors and ensuring alignment with client goals demonstrating **execution ownership beyond core skillset**.
- **Product in Progress — Uxora:** Building an AI-powered UX learning platform that generates real-world design scenarios dynamically using Claude AI. Designed to simulate **product decision-making, not quizzes**, with monetization planned via subscription — positioning as a scalable SaaS under Salkom.

UI/UX Designer

JRK Consulting Services, Chennai (March 2024 – Present)

- Led **end-to-end UI/UX design and frontend development** for the top jewellery companies created **DigiGold App**, a high-scale gold savings platform handling **daily financial transactions at production level**, enabling users to enroll, pay, and track schemes seamlessly.
- Designed and shipped **30+ web and mobile products** for leading jewellery brands including **Pothys, GRT Jewellers, Lalitha Jewellery, and Mangal & Mangal**, delivering consistent, conversion-focused user experiences across platforms.
- Built **responsive, high-performance interfaces** using **Flutter (UI), Angular, Bootstrap, and GSAP**, directly contributing to a **15% increase in user engagement** across key projects.
- Established **pixel-perfect UI systems and motion interaction standards**, reducing **design-to-development handoff time by 25%** and improving implementation accuracy across teams.
- Acted as a **bridge between design and engineering**, collaborating with developers, managers, and stakeholders to translate business requirements into scalable product experiences.
- Worked closely with **client-side stakeholders and retail decision-makers** to ensure **brand consistency, usability, and business alignment** across digital touchpoints.

FLAGSHIP PRODUCT

Uxora — AI-Powered UX Learning Platform

Founder-built | Under Salkom Design Studio | Launching 2026

- Built an AI-powered UX learning platform focused on scenario-based product thinking, challenges, and interactive learning experiences for students and professionals.
- Designed a frictionless authentication flow using Google OAuth, reducing signup friction by eliminating manual password, email, and repeated login steps.
- Created 8,000+ pre-generated UX scenarios and 2,000+ challenges across 50+ domains using the internally developed Salkom Forge Engine for scalable and cost-efficient content generation.
- Developed intelligent systems including Reality Engine, Pressure Engine, Consequence Engine, Cognitive Maturity Scoring, and Anti-Duplication Logic to generate unique learning experiences dynamically.
- Designed XP-based progression systems where completed scenarios and challenges reward users with points, levels, and global/country leaderboard rankings.
- Implemented LinkedIn sharing flows for daily scenario completion scores and milestone achievements to encourage engagement and community-driven growth.
- Built subscription-based monetization with 28-day billing cycles, referral rewards, AI-powered challenge reviews, learning insights, and certification systems unlocked after every three completed learning cycles.
- Led product design and frontend development using Figma and Flutter, integrated Razorpay for subscription management, and prepared the product for Play Store deployment.
- Collaborated with backend engineers on API integration, authentication systems, cloud infrastructure, and scalable product workflows.
